PROFESSIONAL SUMMARY

Full-stack web developer running live, revenue-driving sites for clients in legal services, real estate media, e-commerce, and marketing. I build end to end — Figma prototype to deployed product — across WordPress/WooCommerce, React/Next.js, and Spring Boot stacks, and handle the unglamorous parts too: hosting, DNS, deployments, analytics, and ongoing maintenance. Currently completing a BS in Information Technology at UA&P (Dean's List) while consulting and freelancing.

PROFESSIONAL EXPERIENCE

Delloro Saulog Law Offices — IT Consultant

dellorosaulog.com

Pasig, Philippines

June 2025 – Present

- Engineered a web-based billing and activity monitoring system to automate financial tracking and improve administrative workflow efficiency for the firm
- Rebuilt and maintain the firm's public website — ~2,000 views/day with steady retainer-client conversions
- Optimized existing website interface and content, improving site performance and user experience
- Support hardware diagnostic checks and workflow tool maintenance for legal staff

Showcase Listings Media — Web Developer

showcaselistingsmedia.com

Remote

February – April 2026 • ongoing retainer

- Designed, built, and deployed a real estate media platform end to end: photography/videography showcase with subscription-based delivery
- Grew the site to 3,000–4,000 views per day, generating 10–12 client inquiries daily
- Own the full stack — design, development, hosting, SEO, and ongoing iteration

CM Integrations — WordPress Developer

cmintegrations.co.uk — *WooCommerce e-commerce platform selling software licences*

Remote (UK)

May 2026 – Present

- Built cmi-licensing, a custom WordPress plugin covering the full software-licence lifecycle: licence creation, fulfilment (.lic file generation and activation), hardware attachment with per-licence seat limits, and a versioned database migration system (currently v1.2.7)
- Implemented sequential serial numbering (CMI-000001 format) with trial-specific serials and backfill of existing records
- Built a custom admin dashboard (vanilla JS, jQuery/AJAX) with nonce-secured endpoints — customer list, licence issuance/detach modals, and a hard-delete account tool with type-to-confirm and order-blocking safeguards
- Designed a reseller system: custom WordPress role with approval workflow and a per-reseller pricing engine backed by a dedicated pricing table
- Integrated WooCommerce order-to-licence fulfilment hooks (HPOS-compatible) and custom transactional emails (WC_Email subclasses) via Brevo SMTP; local testing with Mailpit
- Reworked the registration flow and front-end styling; Divi child-theme + ACF homepage rebuild with Vercel static mockups for client preview
- Run git/SSH deploys to Hostinger across 7 tagged releases (v1.2.1 → v1.2.7); manage tickets in ClickUp with QA suites; diagnosed production bugs like £0-coupon orders never firing licence hooks

Ellington Marketing — Web Developer

Web development agency

Remote

May 2026 – Present

- Maintain, fix, and deploy websites across multiple client properties within an agency workflow
- Deploy via ServerAvatar with GitHub integration; manage DNS through Cloudflare
- Work inside the agency's ticketing process — structured tickets, QA, and direct client communication

Freelance Web Developer

Sourced via direct clients and OnlineJobs.ph

Remote

2021 – Present

- Developed and deployed 10+ WordPress and custom websites for business and professional clients
- Increased client web traffic through SEO best practices and streamlined UI/UX
- Manage end-to-end project lifecycles: scoping, Figma prototyping, build, deployment, and handover

PROJECTS

PGKC Integrated System — Capstone Project

Philippine Gamma Knife Center

2025 – 2026

Spring Boot 3.2 • React/TypeScript • PostgreSQL

- Integrated appointment scheduling and electronic medical records (EMR) system replacing manual, paper-based workflows at a specialized medical facility
- Built RESTful backend with Spring Boot and a React Query-driven frontend for real-time UI updates after data mutations
- Successfully defended as capstone project (2026)

Billboard-to-Landing Lead Funnel — Mikey Mash Pro Team

2026 (in progress)

Myrtle Beach, SC real estate team

Next.js • GA4 + Meta Pixel • AWS/Vercel

- Single Next.js landing page converting billboard traffic (domain-only creative) into seller and buyer leads, funneled into the team’s franchise CRM
- Per-billboard UTM attribution so each lead traces back to a specific billboard/city; optional city-dynamic headers via query parameter

Personal Portfolio

GitHub Pages

kevkujo23.github.io/KevinPortfolio

- Live portfolio of client work, projects, and contact channels

EDUCATION

University of Asia and the Pacific (UA&P)

Pasig, Philippines

Bachelor of Science in Information Technology

August 2023 – Present

- GPA: 1.48; Dean’s List (2nd and 3rd Year)
- Expanded Liberal Arts Program (ELAP) Scholar — recognized for academic excellence
- Thesis: An Integrated Appointment Scheduling and Electronic Medical Records System for Enhancing Operational Workflow Efficiency at Philippine Gamma Knife Center
- Finalist/Participant, BPI Hackathon — engineered technical solutions under rapid development cycles

OBMC Greenhills Branch

San Juan, Philippines

Senior High School Diploma in GAS

July 2018 – June 2023

- Member of the Marching Band (Guitar/Percussion); competitor in Extemporaneous Speech and Debate contests

LEADERSHIP & ACTIVITIES

ITeC & ANIMA — Logistics Head

Pasig, Philippines

2024 – Present

- Coordinated equipment and logistics for 10+ student events, managing requirements for audiences exceeding 200 attendees

TECHNICAL SKILLS

- Languages: PHP, Java, Python, JavaScript/TypeScript, SQL, HTML/CSS
- Frameworks & Libraries: Spring Boot, React, React Query, Next.js, WooCommerce, Divi, ACF
- Platforms & Tools: PostgreSQL, Supabase, WordPress, Figma, Git/GitHub, Vercel, AWS, Hostinger, ServerAvatar, Cloudflare DNS, LocalWP, Brevo SMTP/Mailpit, GA4, Meta Pixel, ClickUp/Jira
- Workflow: AI-assisted development (Claude Code, Antigravity), SEO, responsive/mobile-first design, end-to-end client delivery

INTERESTS & GOALS

- Music: self-taught guitarist (acoustic and electric); former Marching Band and Church Choir member
- Athletics: active basketball player
- Cybersecurity: Open Source Intelligence (OSINT) and white-hat security research
- Future goal: pursue a Juris Doctor (JD) after BS IT to bridge technology and law
